

# GP Batteries

Powering a Greener Tomorrow

GP Alkaline Cylindrical Batteries possess a higher energy density and hence provide long lasting power to support industrial usage.

Alkaline batteries have a comparatively high energy density and long operating time while producing almost the same level of voltage during their runtime. It has been widely used in all kinds of application. This makes alkaline batteries technology advanced to a dominant position in the portable battery market because of its reliable and long operating power.

## FEATURES:

- Optimized current and continuous drain
- Superior performance at all drain levels
- Wide operating ranges of temperature
- Environmental friendly
- Comply with IEC, ANSI and JIS standards

Exclusive Distributor:

## PACIFIC SECURITY SYSTEMS

### MANILA:

Mary Bachrach Building  
Corner 25<sup>th</sup> & Railroad Street  
Port Area, Manila 1018
